

Shaun Fix

Shaun Fix has been practicing and teaching in the hospital and pre-hospital field since 1983. He is the president of Emergency Medical Consultants, Inc. and served 35 years as a company officer in charge of Emergency Medicine for Boca Raton Fire Rescue Services in the Palm Beach area of South Florida.

Our team has been presenting Management of Office Emergencies for Dental Professionals since the 90's and along with Dental Specialty ACLS courses, helped present the original curriculum for the Dental Airway Course with members of the FSOMS board. We have presented at FSOMS, FAP, and Florida Dental Board conferences.

Shaun has presented programs at State, National and International Conferences and has appeared on FETN, Pulse, 24-7 EMS, Medic Monthly, and Emergency Medical Update videos. A frequent lecturer, author and consultant, Shaun and his group are best known for keeping their programs upbeat and relevant while bringing "the reality of emergency medicine" to the classroom setting and providing onsite relevant training based on the providers specific needs.

Dr. Dennis P. Tarnow

Dr. Dennis Tarnow is currently Clinical Professor of Periodontology and Director of Implant Education at Columbia School of Dental Medicine. He is the former Professor and Chairman of the Department of Periodontology and Implant Dentistry at New York University College of Dentistry. Dr. Tarnow has a certificate in Periodontics and Prosthodontics and is a Diplomat of the American Board of Periodontology. He is a recipient of the Master Clinician Award from the American Academy of Periodontology, Teacher of the Year Award from New York University and Distinguished Lecturer Award from the American College of Prosthodontists in 2015. Dr. Tarnow has a private practice in New York City, and has been honored with a wing named after him at New York University College of Dentistry. He has published over 200 articles on perio-prosthodontics and implant dentistry and has co-authored four textbooks including one with Dr. Stephen J. Chu titled 'The Single Tooth Implant.' Dr. Tarnow has lectured extensively in the United States and internationally in over forty-five countries.

COURSE DESCRIPTIONS:

Friday, August 13

Shaun Fix, President - Emergency Medical Consultants, Inc.
4 CEUs - 12:30pm-5:00pm
Airway Management Course

The course will provide didactic, video, and case-based hands-on skills labs dealing with medical and airway emergencies possible in the dental and sedation settings.

Participants will review, practice, and demonstrate proficiency in managing emergencies including but not limited to respiratory distress and failure, using bag mask, oral and nasal airways, perilyngeal devices, as well as intubation and cricothyrotomy. Recognizing and treating emergencies such as cardiac events, stroke, syncope, seizures, allergic reactions, and laryngospasm will be reviewed and practiced.

This four hour program meets the Florida Board of Dentistry requirements for sedation permit holders..

Saturday, August 14

Dr. Dennis Tarnow - 5 CEUs - 9am-4pm

Morning Lecture: **Immediate Extraction Socket Management in the Esthetic Zone and Molars** - *What we know, what we think we know, and what we don't know about.*

Immediate placements of implants into extraction sockets is an exciting treatment alternative for our patients. However, there are many potential short and particularly long-term risks which the practitioner must be fully aware of. This presentation will focus on the potential problems and benefits both clinically and biologically when the choice of immediate socket placement is made for single and multiple sites. This will be an evidence-based presentation that will be objective about the best and simplest way to treat these types of cases.

Upon completion of this presentation participants should be able to:

- Identify what type of healing takes place against the implant in immediate socket placement

- Know how to minimize recession with immediate provisionalization
- Know the proper crown contour for immediate provisionals
- Know if the gap distance really matters
- Know if primary closure should be attempted or should it be left open?
- Know if membranes should be utilized?
- Know what type of graft material if any should be utilized?
- Identify what are the potential short and long term risks involved with immediate placement of implants

Afternoon Lecture: **Interdisciplinary Management of Aesthetic Problem Cases**

The treatment planning of complex cases requires the highest level of knowledge and skill of the treating team. It is an orchestration of procedures including proper sequencing and timing that makes the difference. An envisionment of the final case before starting is required to know where the goal of treatment will be directed. This, in conjunction with the patient's needs and clinical situation comprise the decision-making process for what is the best treatment for the patient.

Problems facing the team such as:

- Which teeth to save or extract?
- Should implants be placed immediately or in a delayed protocol?
- Should multiple implants be placed in the aesthetic zone?
- When and how to include orthodontics if needed for sight development
- Should pink ceramic be used or should ridge augmentation be performed?
- Should the case be splinted or broken up into separate bridges or individual teeth?
- How to provisionalize the case throughout treatment
- When to immediate load cases versus do a serial extraction case

These concerns will be addressed in this interdisciplinary approach to our most challenging cases.
