

Mr. Shaun Fix
Shaun Fix has been practicing and teaching in the hospital and pre-hospital field since 1983. He is the president of Emergency Medical Consultants, Inc. and served 35 years as a company officer in charge of Emergency Medicine for Boca Raton Fire Rescue Services in the Palm Beach area of South Florida.

His team has been presenting Management of Office Emergencies for Dental Professionals since the 90's and along with Dental Specialty ACLS courses, helped present the original curriculum for the Dental Airway Course with members of the FSOMS board. He has presented at FSOMS, FAP, and Florida Dental board conferences.

Shaun has presented programs at State, National, and International Conferences and has appeared on FETN, Pulse, 24-7 EMS, Medic Monthly, and Emergency Medical Update videos. A frequent lecturer, author and consultant, Shaun and his group are best known for keeping their programs upbeat and relevant while bringing "the reality of emergency medicine" to the classroom setting and providing onsite relevant training based on the provider's specific needs.

Dr. Craig Misch
Craig Misch received certificates in postgraduate prosthodontics, oral implantology as well as a Master of Dental Science from University of Pittsburgh. Thereafter, he became faculty and acted as Co-Director of the University of Pittsburgh Oral Implantology Center. Dr. Misch also completed specialty training in Oral and Maxillofacial Surgery in Pittsburgh and is board certified by the American Board of Oral and Maxillofacial Surgery. Dr. Misch practices as a dual specialist in Sarasota, Florida. He is a Clinical Associate Professor at the University of Florida, Penn and Michigan in the departments of Periodontics and Prosthodontics. Dr. Misch serves as Editor in Chief of the International Journal of Oral Implantology and is on the editorial boards of the Journal of Oral Implantology, International Journal of Periodontics and Restorative Dentistry and Dentistry Today. He has been a featured speaker for numerous organizations and has published extensively with over 50 publications and 22 textbook chapters.

COURSE DESCRIPTIONS:

Friday, August 11

Mr. Shaun Fix – 5 CEUs
Emergency Medical Consultants, Inc.

Management of Medical and Airway Emergencies In The Dental Office
This half day course will provide didactic, video, and case-based hands-on skills labs dealing with medical and airway emergencies possible in the dental and sedation settings. Participants will review, practice, and demonstrate proficiency in managing emergencies including but not limited to respiratory distress and failure, using bag mask, oral and nasal airways, perilaryngeal devices, as well as intubation and cricothyrotomy. Recognizing and treating emergencies such as cardiac events, stroke, syncope, seizures, allergic reactions and laryngospasm will be reviewed and practiced.

This course meets the Florida standard by discussing monitoring and recognition of airway and respiratory emergencies in the dental setting then utilizing standard airway equipment. Through the use of video, slides, case reviews, and hands-on skills labs, participants will review the anatomy of the airway and the physiology of adequate ventilations followed by skills labs in basic and advanced procedures including:

- Bag Valve Device
- Oral and Nasal Airways
- Perilaryngeal Devices
- Intubation Techniques
- Emergency Pharmacology
- Emergency Cricothyrotomy

This program meets the Florida Board of Dentistry requirements for sedation permit holders.

Saturday, August 12

Dr. Craig Misch – 5 CEUs

Current Trends in Bone Augmentation
Bone augmentation is often required to place an adequate number of dental implants in ideal positions for prosthetic support. In addition to improving biomechanics, bone enhancement can improve esthetic outcomes. There are several techniques and materials available for implant site development. The choice may depend on a number of factors including size of the defect, osseous morphology, costs and surgeon or patient preferences. The use of autogenous bone is still a mainstay in our surgical techniques but growth factors can be used as an alternative. Inherent disadvantages of bone grafting techniques include increased morbidity, surgical time, costs and treatment length. As such, a trend has developed towards alternative augmentation procedures with less morbidity and more minimally invasive approaches that avoid the need for bone grafting, including shorter and narrower implants, angled implants and/or fewer implants for prosthetic support. Rather than surgically reconstructing esthetic zone defects, many clinicians opt to replace the missing hard and soft tissue with the prostheses. This presentation will guide clinicians on implant rehabilitation with grafting and non-grafting approaches.

- At the conclusion of this lecture, attendees will be able to:
- 1) Discuss alternative methods and materials to manage sites with reduced bone volume using an evidence-based approach
 - 2) Review methods that may reduce morbidity for bone augmentation
 - 3) Discuss the advantages and disadvantages of grafting and non-grafting solutions
